

Dear Sir, Over the past several months I have begun to listen almost exclusively to satellite radio. I listen to satellite radio because it offers superior programming that is not available in AM or FM radio. I have converted all my autos and home radios to satellite. I rely on it for both entertainment and news. Please reject the NAB's petition 04-160 and allow XM to continue all their programming including weather and traffic. I am never without satellite radio and rely on it. Sincerely Yours,
Paul Burns
